(a) Throughput vs injection rate
uniform-random cross-node, 8n x 4g, RoCE 400G, DCQCN on
delivered throughput (Gbps, aggregate)
injection rate (fraction of 400G line rate per GPU)
offered (ideal)
fullmesh
ring
host
tor
rail
leafspine
torus2d
dragonfly
(b) DCQCN congestion signal
(zero where no EthernetSwitch is in the So path)
ECN-marked packets (count)
injection rate (fraction of 400G line rate per GPU)
